Summary

Front-end Developer with a preoccupation for creating web applications that are user friendly, with a focus on accessibility. New and improved knowledge in skills such as: JavaScript, React, Node, Jest, and many others. Recently worked with a company in Mexico and learned to use purchased Themes, Wordpress, Filezilla, and a few different domain hosters. Waiting to use these skills in an environment that focuses on quality and effectiveness, to bring fully functioning websites to our clients.

Technical Skills

Soft Skills:

Languages: HTML, CSS, JavaScript, PHP, MySQL, Java

Applications: Git, Node, Jest, ExpressJS, Sequelize, JQuery, phpMyAdmin, Terminal

Projects

TradeUp |

https://github.com/iannicholas/Project-2.git

https://rocky-island-25113.herokuapp.com/

Propose trades, accept offers, or barter with other users to find what you are looking for.

We used NodeJS, ExpressJS, Sequelize, HandlebarsJS, MaterializeCSS and MySQL for this project. Tested on Insomnia and launched with Heroku.

The Restroom Hunters |
https://github.com/therestroomhunters/public-restroom-search.git
https://therestroomhunters.github.io/public-restroom-search

Looking for a restroom near you, we have the answer. Just allow your location or type in the search field. We will find you ADA, Unisex, or Baby Changing restrooms nearby.

I was assigned to use the refuge restrooms API. Pulled data that we thought was necessary. Also helped with HTML and Bulma CSS Framework.

Refugerestroom API, Mapbox API, Bulma CSS Framework

Weather Dashboard |

https://github.com/iannicholas/06-Server-Side-APIs-IanNicholas-Homework

https://iannicholas.github.io/06-Server-Side-APIs-IanNicholas-Homework

Need to know the weather tomorrow or traveling and trying to plan what to pack? Just type in the city you are looking for and it will give you a current report and 5 day report.

Used Bootstrap and Openweather API.

Password Generator |
https://github.com/iannicholas/03-JavaScript-Homework-Ian-Nicholas
https://iannicholas.github.io/03-JavaScript-Homework-Ian-Nicholas

Need to change your password, are there a lot of criteria to be met by your employer or app you are using. This application will generate a random password for you.

This application is made with HTML, CSS, and JavaScript
